

400 millions Windows 7 licenses in the world

Beautiful performance for Windows 7 which sold 400 million copies in the world, less than two years after its exit.

Microsoft is happy to announce the sales of its last operating system to computers. Taken out on October 22nd, 2009, Windows 7 is present in 400 million PC today.

It is an excellent curve of sales for the system of Microsoft. In one year only, Windows 7 increased its sales of 250 million copies. After 18 months of existence, the system already counted 350 million users.

At the same time as this announcement, Microsoft declares to have sold 100 million licenses of Office 2010.
